

Whales and Seaforestation Discovery Kit Overview

Recommended grade level: K-3

What to do when you open this kit!

1. Explore the artifacts and objects listed below with your class. When relevant, discuss as a class **what** these artifacts are, and **why** they look the way they do. The included [Artifact Info Sheet](#) provides facts and identification information about artifacts, and tips for using the other objects in your kit.
2. Locate the [Pre & Post Session Activities: Whales Kit sheet](#). It outlines program competencies, vocabulary, and curriculum ties. It also provides detailed instructions about activities and how to prepare for your virtual session.
3. The images included in this kit can be used to illustrate the animals you discuss.
4. Included books can be explored with your class to further explore the topics of whales and Indigenous culture in Canada.
5. Activity sheets for printing can be found on the included USB stick.
